I spoke with John Meyer this weekend and he indicated that Kel will be giving an overview of all of the Superfund Task Force recommendations during a Bristow City Council meeting.

Subject: Task Force Meeting: Wilcox update

Hi Casey,

Thank you for taking care of the Wilcox questions while I was out last week. I appreciate it. I do not know why the urgency or the reason for the request. Unless, it was related to a reporter question which was already responded to by both EPA and ODEQ. In addition, I am not certain how the media came into this information since we only spoke directly to a handful of property owners.

As for the March visit, I have no further information than you. I have asked Blake to get with Carl to find out more. I have no details related to the location, purpose, discussion topics, etc. I was contacted directly by Kel Kelley through email asking if there was availability for March 15, however, I have left a formal response open for Carl (or RA).

As for the site, it is in RI/FS. We have completed several field investigation events, however the FS has not been started. There have been no final remedy decisions made.
